which she agreed to do. In three months from that time she wrote to me, stating that the child was entirely well. There was not a sore about it, its eight was restored, and it could run about as smart as any child of its age. This care was performed over nine years ago. I know the child is still living, and has had no return of the disease; I also know that Dr. Westervelt has since cured other members of the family of the same disease. I give this statement as above with pleasure, hoping others may be benefitted by it.
